¹ *Consolle* is the program used by Italian judges. In these sessions the students will visit the *Tribunale* of Pavia and have a chance to see how judges use the program and, also, to perform some basic activities on it.

² ALST stands for *The Multilingual Archive of the Law of Science and New Technologies* (ALST), an ECLT platform that offers an original solution for legal multilingualism. The students will be provided with UserID and PW and will work directly on the ALST.

³ At its origin Hackathon is an event in which computer programmers and others involved in software development collaborate intensively on software projects. In the WS student teams will be assigned a legal topic to be solved.
